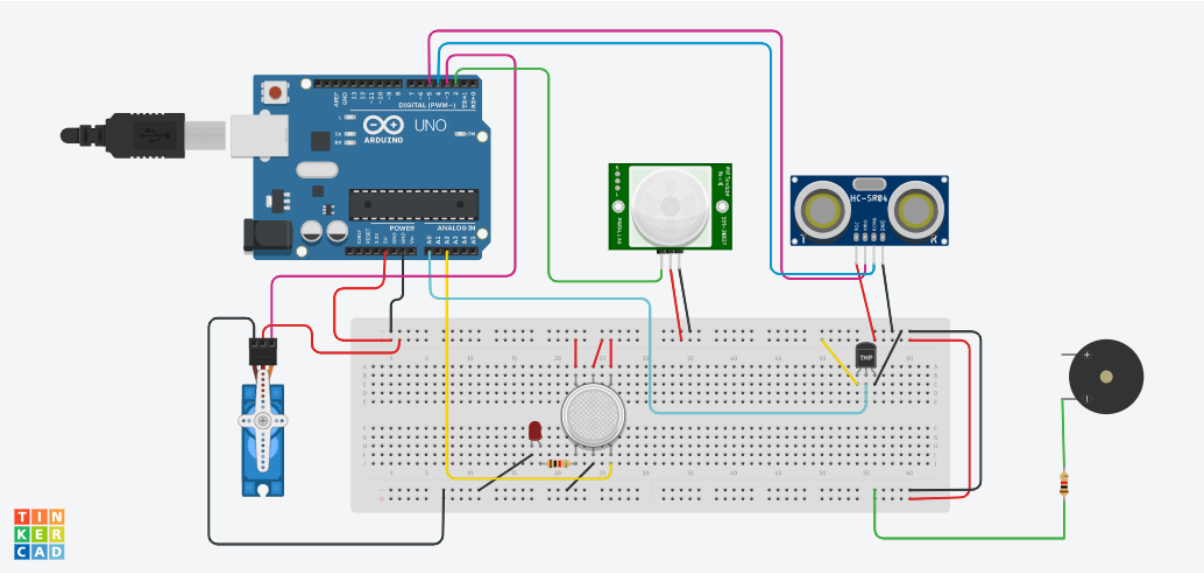
ASSIGNMENT- 1

Name:- Chrysolite Joy S

Reg.No:- 110719106005

OBJECTIVE:-

Built a smart home in tinkercad. Using at least 2 sensors, led, buzzer in a circuit. Stimulate in a single code



CODE:-

```
#include <Servo.h>

int sensor_state = 0;

int distance = 0;

long readUltrasonicDistance(int triggerPin, int echoPin)

{

  pinMode(triggerPin, OUTPUT);  // Clear the trigger

  digitalWrite(triggerPin, LOW);

  delayMicroseconds(2);

  // Sets the trigger pin to HIGH state for 10 microseconds

  digitalWrite(triggerPin, HIGH);

  delayMicroseconds(10);
```

```
  digitalWrite(triggerPin, LOW);
  pinMode(echoPin, INPUT);
  // Reads the echo pin, and returns the sound wave travel time in microseconds
  return pulseIn(echoPin, HIGH);
}
Servo servo_3;
void setup()
{
  pinMode(2, INPUT);
  servo_3.attach(3, 500, 2500);

  pinMode(7, OUTPUT);
  pinMode(A2, INPUT);
}
void loop()
{
  distance = 0.01723 * readUltrasonicDistance(5, 4);
  sensor_state = digitalRead(2);
  servo_3.write(0);
  // if sensor_data is high, rotate servo motor, else
  // close it.
  if (sensor_state == HIGH) {
    servo_3.write(45);
    servo_3.write(0);
    delay(4000); // Wait for 4000 millisecond(s)
    servo_3.write(0);
    tone(7, 123, 1000); // play tone 35 (B2 = 123 Hz)
```

```
  }
  if (distance <= 100) {
    servo_3.write(80);
    tone(7, 123, 1000); // play tone 35 (B2 = 123 Hz)
    delay(4000); // Wait for 4000 millisecond(s)
    servo_3.write(0);
  } else {
    servo_3.write(0);
  }
  if (analogRead(A2) > 350) {
    servo_3.write(90);
    tone(7, 220, 10000); // play tone 45 (A3 = 220 Hz)
    servo_3.write(0);
  }
}
```
