

Says

What have we heard them say?
What can we imagine them saying?

Thinks

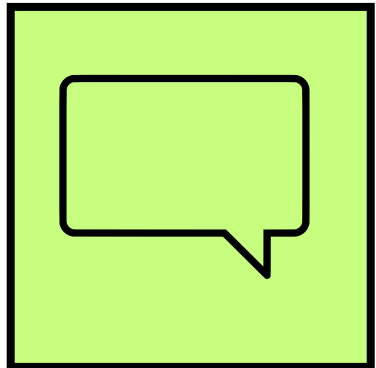

What are their wants, needs, hopes,
and dreams? What other thoughts
might influence their behavior?

to keep
track on the
balance
medicine

want a
remainder on
when to take
the medicine

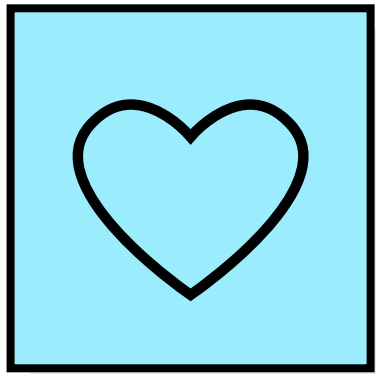

they want
someone be
their side to
take care of
them

to updates
the care taker
or nurse
about the
timing details

to give a
remainder
to take the
medicine

Gives a
remainder when
a medicine
should be taken

user friendly

the care taker
can track the
balance
medicine

alerts the
caretaker or
nurse in a
situation of
emergency

less
consumption

Stores data
in the cloud

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and
anxieties? What other feelings might
influence their behavior?

PAIN

data can be
hacked

IOT
implementation
is costly

in case of
failure, the
alarm might
be off

GAIN

medication
remainder
serves as a
good way to
stay on track

patient
himself can
learn about
medicines

a boon for
someone
who a no one
to take care
of.
